KEY INSIGHTS & BUSINESS RECOMMENDATIONS

KEY INSIGHT 1

Technology is the strongest profit contributor

Technology generates the highest profit, while furniture has higher sales but considerably lower profit.

KEY INSIGHT 2

Profitability varies across sub-categories

Copiers generate the highest profit , while Storage has the lowest profit among the sub-categories shown.

KEY INSIGHT 3

Regional profitability is uneven

The West region has the highest profit , while Central records the lowest profit.

Business Recommendations

1. Focus on high-profit categories

Prioritize products and strategies that support strong profitability, particularly within Technology.

2. Review low-profit sub-categories

Analyze pricing, discounts, costs, and product performance for low-profit sub-categories such as Storage.

3. Improve weaker regional performance

Investigate the reasons behind Central's lower profitability and identify opportunities to improve sales and margins.

Overall Conclusion

The analysis shows that higher sales do not always lead to higher profit. Focusing on profitable products, improving weak sub-categories, and addressing regional performance gaps can support better business outcomes.
